

KNOW WHAT NEEDS TO BE BAGGED

Thank you for choosing Talos fumigation, the treatment that is proven to rid your home of termites. Now that you have chosen whole-structure fumigation with Talos, certain steps must be taken to keep food items and other perishable goods protected during the fumigation process. It is important to know exactly which household items need to be double-bagged in special bags.

Sealed items that will NOT require bagging:

- Any food, feed, drugs (including tobacco products) and medicinals if sealed in glass, plastic or metal bottles, jars or cans with the **original manufacturer's airtight seal intact**.

Opened items that will NOT require bagging:

- Dental hygiene products (including toothpaste, mouthwash, dental adhesives, and dental whitening products)
- Cosmetics, including lipstick, and all externally applied lotions and ointments
- Ice and water

Do not forget items in refrigerators and freezers. Refrigerator and freezer can be left on (we dont turn off electricity).

When in doubt, take it out:

- Any products not listed above that may require protection should be bagged or removed from the structure being fumigated. If you have any questions about what should be bagged, please contact Talos at **888-343-6251** or email **termite@talospestcontrol.com**.
- Medicine, tobacco, vitamins and other ingestible pills, supplements and lozenges if not sealed in glass, plastic or metal jars or cans with the **original manufacturer's seal intact**.
- Pet food and animal feed in bags and boxes.

Sample items that must be bagged or removed from the structure being fumigated:

- Any food, feed, drugs and medicinals if not sealed in glass, plastic or metal bottles, jars or cans or **without the original manufacturer's airtight seal intact**.
- Chips, pasta, bread, cereals, rice, cookies, crackers and any other items packaged in plastic, paper or cardboard bags or boxes, even if they have never been opened.
- Beverages, snacks, sauces, drugs, medicinals or other items in metallic foilled containers such as pouches, boxes or blister packs
- Anything in resealable containers, including plastic containers, such as milk, butter, sour cream and cottage cheese.
- Eggs, fruits, vegetables and any other forms of produce.

Example of double-bagging items.

PREPERATION FOR TERMITE FUMIGATION

In addition to the work performed by the fumigator that we assign to your account, it is your responsibility to help prepare your home for the fumigation. Taking the following steps prior to fumigation helps ensure its success, resulting in the elimination of Drywood termites from your home.

Scheduling and Preperation - Talos will provide additional home preparation documents prior to your scheduled tent fumigation.

- Schedule your fumigation and sign and return All documents well in advance of your fumigation date.
- We provide 20 special bags for food preparation. Please pick them up at our office or contact us and we will make arrangements to have them delivered prior to the fumigation.
- Call SDG&E prior to your scheduled fumigation to arrange for their "Restore service" visit.

The Day Before Fumigation

- Water the soil up to 18 inches from the outer walls of your home to protect outdoor plants and shrubs.
- Cut back foliage, shrubbery and landscaping at least 12 inches from the structure to allow room for tarps.
- Make overnight arrangements for you and your pets, as the fumigation will typically take 3 days and 2 nights.
- Fumigations cannot be performed in strong winds and will be rescheduled if there is inclement weather.

The Day Of Fumigation - We need your keys! Please contact us to make arrangements for your keys for your fumigation. If security during the fumigation is a concern, contact our office for more information.

- Prepare a set of keys for the crew and put them in the lock box. Fumigation cannot be performed without a copy of the keys for access to the home.
- Remove all plants from your home, including those on outdoor patios.
- Evacuate all people and pets from the structure.
- Remove mattresses completely enveloped in plastic, such as baby mattresses with waterproof covers, or remove or open the covers.
- Remove or double-bag anything that will be ingested: food, drugs (including tobacco products), medicinals, spices, etc. in the special bags provided. You do not need to bag or remove items in plastic, glass, or metal bottles, cans or jars with the **original manufacturer's seal intact** (refer to the Fumigation Planning Guide).
- Seal the Nylofume bags by following the special instructions provided with the bags.
- Double-bag (in Nylofume) cold and frozen foods and leave them in the refrigerator and freezer. Remove shelves from the refrigerator and freezer to make it easier to stack the bags inside.

After Fumigation

- It is unnecessary to wash dishes, linens, clothing, etc., as Vikane is a gas and will dissipate from the structure.
- Retain the "Clear to Enter" notice that was posted on your house. The utility company representative will request to see it.
